To: Barstow Aviation Advisory Commission
From: Bradd Maki, Assistant Airport Manager *flm*
Date: October 23, 2008
Subject: Project Updates

Assistant City Engineer Bradd Maki will provide a project status report of the AWOS system and the new fuel tank installation.

The City met with MDOT and the airport consultant on May 14th to discuss both projects.

The AWOS installation began on October 16, 2008. Completion is estimated for mid-November.

City cost share for a new above ground facility will be 2.5% of the total federal grant amount, or about \$5,000 to \$6,000. The fuel tank project will be bid following assurance of 2009 federal grant entitlement funds in Spring 2009, just in case the overall project cost is greater than the current entitlement.

We have found that federal funds cannot be used for underground fuel facilities so we will continue to pursue the new above ground tank installation.
