R323.1703 Soil erosion and sedimentation control plan requirements.

Rule 1703. A person shall prepare a soil erosion and sedimentation control plan for any earth change identified in R 323.1704. A person shall design the plan to effectively reduce accelerated soil erosion and sedimentation or both. The plan shall include, but not be limited to, all of the following:

- (a) A map or maps at a scale of not more than 200 feet to the inch or as otherwise determined by the county or local enforcing agency. A map shall include a legal description and site location sketch that includes the proximity of any proposed earth change to lakes or streams, or both; predominant land features; and contour intervals or slope description.
- (b) A soils survey or written description of the soil types of the exposed land area contemplated for the earth change.
- (c) Details for proposed earth changes including all of the following:
 - (1) A description and the location of the physical limits of each proposed earth change.
 - (2) A description and the location of all existing and proposed on-site drainage and dewatering facilities.
 - (3) The timing and sequence of each proposed earth change.
 - (4) A description and the location of all proposed temporary soil erosion control measures.
 - (5) The location and description for installing and removing all proposed permanent soil erosion and sediment control measures.
 - (6) A program proposal for the continued maintenance of all permanent soil erosion and sediment control measures that remain after project completion, including the designation of the person responsible for the maintenance. Maintenance responsibilities shall become a part of any sales or exchange agreement for the land on which the permanent soil erosion control measures are located.
